

Brooks Cutter

Principal Technical Program Manager - AI Infrastructure, LLM Inference, and Platform Delivery

Seattle, WA | brooksc@brooksc.com | 650-785-4656 | linkedin.com/in/brooksc | github.com/brooksc

EXECUTIVE SUMMARY

Principal TPM operating in production AI infrastructure at Meta -- LLM inference, GenAI launches, dataset governance, and the cross-org execution that ties serving, ranking, and hardware together. Coordinated cross-org execution of Meta's first production migration of a recommendation workload to next-gen LLM inference across NVIDIA H100/H200 and AMD MI350X. Before AI infrastructure, founded and ran Meta's API Governance program (2019-2024) as a 10-TPM organization across Meta's external API surface. 16+ years at Microsoft delivering platform, cloud, and embedded-systems programs at international scale.

PROFESSIONAL EXPERIENCE

Meta Platforms Inc.

Principal Technical Program Manager / Group TPM / TPM Manager

Feb 2019 - Present

- Most recently ran LLM inference and Responsible Engineering programs in Meta's AI infrastructure org. Coordinated cross-org execution of Meta's first production migration of a recommendation workload to next-gen LLM inference on NVIDIA H100/H200 and AMD MI350X, reducing GPU footprint approximately 57% (~200 GPUs).
- Drove cross-org delivery of two first-of-their-kind LLM launches on Meta's ranking and search surfaces (generative recommendation pipeline and Llama-based search-relevance model), contributing to ranking gains credited with approximately \$253M per year in incremental Ads revenue.
- Most recently managed 5 TPMs in AI Data and Responsible Engineering; drove access-friction work reducing interrupted data queries from 35% to 1.4% (beating the reliability target) and applied LLM tooling to automate routine data-access workflows.
- Drove the third-party dataset review process for Llama 4 (acknowledged in the whitepaper) -- stood up the workflow from scratch with Legal, aligned 252 AI researchers and a 48-person cross-functional team, and drove 575 reviews (88% on Llama 4 training critical path).
- Supported LlamaFirewall (Meta's open-source guardrails for AI agents) and drove 59 novel GenAI risk reviews. Ran executive-level policy reviews for major GenAI launches.
- Founded and ran Meta's API Governance program from 2019 through 2024 as a 10-TPM organization. Drove API review cycle time from 92 days to 5, enabling 600+ product teams to ship 90% faster. Meta's CPO cited the program as a company-wide benchmark for cross-functional execution.

Syntonic Inc.

Director of Program Management

Jun 2017 - Feb 2019

- Delivered mobile data integrations for network operators across Asia and Africa; managed India-based engineering team from requirements through carrier certification and launch, shipping 10 iOS/Android applications, 4 SDKs, and multiple carrier integrations. Introduced product roadmaps, structured bug tracking, and automated testing.

Mast Mobile Inc.

Principal Program Manager

Jun 2014 - Jun 2017

- Launched a dual-phone identity platform end-to-end across iOS, Android, web portals, carrier provisioning, VoIP, CRM, onboarding, number porting, and fraud management; built end-to-end test coverage across carrier systems, VoIP providers, Salesforce, and Microsoft Dynamics.

m-ize Inc.

Senior Program Manager

Oct 2013 - Jun 2014

- Led delivery planning and offshore execution for customer projects, including scope definition, implementation coordination, and release tracking across engineering and client stakeholders.

Microsoft Corporation

Principal / Group / Lead Program Manager

May 1996 - Nov 2012 (16+ years)

- Launched the Zune Marketplace backend in 3 months as Senior PM, managing content ingestion, encoding, encryption, delivery, and licensing dependencies across client and service teams.
- Expanded Xbox Music to 22 international markets as Principal PM Architect, managing multi-platform releases across Xbox 360, Windows Phone, and Azure-based content processing.
- Established Microsoft's digital-media-rights leadership as Group PM for Windows Media DRM -- directed 8 PMs across DRM product strategy, partner certification, and standards engagement (FCC Broadcast Flag approval, AACs for Blu-ray and HD DVD).
- Earlier as Lead PM, enabled Windows Media Audio on hundreds of portable-media-player models by delivering a codec porting kit and conformance-test program for ARM, TI DSP, and other embedded silicon partners.

CORE STRENGTHS

LLM Inference and Hardware Migration - Recommendation Systems and Ranking - GenAI Dataset and Model-Launch Programs - Cross-org Execution - Operational Reliability - GPU Infrastructure

TECHNICAL SKILLS

AI and LLM Infrastructure: LLM inference, model serving, inference efficiency, recommendation systems, search relevance, LLM evaluation, dataset governance, RAG, prompt engineering, responsible AI, vLLM, NVIDIA H100/H200, AMD MI350X.

Selected AI Tooling Projects: Use Claude Code and Codex daily; built multiple MCP servers and skills, a multi-LLM document-review plugin, semantic-search developer tools, and local-LLM file automation. Top external contributor to johannesjo/parallel-code (open-source coding-agent project); contributed the multi-agent orchestration component.

Languages and Platforms: Python, Node.js, Bash/Shell, SQL, REST, GraphQL, AWS, Git/GitHub.

Program Disciplines: Cross-org dependency management, risk and milestone tracking, post-mortem and SLO practice, executive stakeholder engagement, regulator-driven delivery.

PATENTS, CERTIFICATION, AND EDUCATION

Patents: Eight issued patents spanning digital rights management, licensing, device certificates, symmetric-key optimization, and member-based domain architecture. **Certification:** Project Management Professional (PMP).

Education: B.S. in Computer Science, Eckerd College.
