

Brooks Cutter

Principal TPM / Platform Product Leader - Developer Platforms, API Governance, AI Infrastructure

Seattle, WA | brooksc@brooksc.com | 650-785-4656 | linkedin.com/in/brooksc | github.com/brooksc

EXECUTIVE SUMMARY

Principal program and platform leader with deep experience governing developer platforms, APIs, and AI infrastructure at Meta and Microsoft. Founded and ran Meta's external API Governance program -- the FTC consent-decree response -- as a 10-TPM organization with oversight of API design, developer access controls, third-party app review, and regulator compliance for Meta's external developer APIs. Most recently ran LLM inference and Responsible Engineering programs in Meta's AI infrastructure org. 16+ years at Microsoft on platform standards work spanning Windows Media DRM, embedded codecs, and content-delivery infrastructure.

PROFESSIONAL EXPERIENCE

Meta Platforms Inc.

Principal Technical Program Manager / Group TPM / TPM Manager

Feb 2019 - Present

- Founded and ran Meta's post-Cambridge-Analytica API Governance program from 2019 through 2024 as a 10-TPM organization with oversight of API design, developer access controls, third-party app review, and FTC/EU regulator compliance for Meta's external APIs -- the FTC consent-decree response.
- Drove API review cycle time from 92 days to 5, enabling 600+ product teams to ship third-party integrations approximately 90% faster. Meta's Chief Product Officer cited the program as a company-wide benchmark for cross-functional execution.
- Rationalized the external API surface from 10,000+ endpoints to roughly 6,000 and processed 21,000+ API risk reviews across a 159-reviewer matrix including Director- and VP-level stakeholders.
- As Safeguard Owner for 20% of Meta's global privacy controls, consolidated 32 redundant safeguards, led FTC and EU regulator assessor responses, and drove resolution of 29 high-priority compliance issues.
- Since 2024: drove the third-party dataset review process for Llama 4 (acknowledged in the whitepaper), supported LlamaFirewall (Meta's open-source guardrails for AI agents), and ran executive-level policy reviews for major GenAI launches.
- Most recently ran LLM inference and Responsible Engineering programs in Meta's AI infrastructure org. Coordinated cross-org execution of Meta's first production migration of a recommendation workload to next-gen LLM inference on NVIDIA H100/H200 and AMD MI350X, reducing GPU footprint approximately 57% (~200 GPUs).

Syntonic Inc.

Director of Program Management

Jun 2017 - Feb 2019

- Delivered mobile data integrations for network operators across Asia and Africa; managed India-based engineering team from requirements through carrier certification and launch, shipping 10 iOS/Android applications, 4 SDKs, and multiple carrier integrations. Introduced product roadmaps, structured bug tracking, and automated testing.

Mast Mobile Inc.

Principal Program Manager

Jun 2014 - Jun 2017

- Launched a dual-phone identity platform end-to-end across iOS, Android, web portals, carrier provisioning, VoIP, CRM, onboarding, number porting, and fraud management; built end-to-end test coverage across carrier systems, VoIP providers, Salesforce, and Microsoft Dynamics.

m-ize Inc.

Senior Program Manager

Oct 2013 - Jun 2014

- Led delivery planning and offshore execution for customer projects, including scope definition, implementation coordination, and release tracking across engineering and client stakeholders.

Microsoft Corporation

Principal / Group / Lead Program Manager

May 1996 - Nov 2012 (16+ years)

- Established Microsoft's digital-media-rights leadership as Group Program Manager for Windows Media DRM -- directed 8 PMs across DRM product strategy, partner certification, and standards engagement. Secured FCC Broadcast Flag approval and drove AACS standards engagement for Blu-ray and HD DVD encryption.
- Shipped platform-grade APIs and SDKs as Lead PM for Windows Media Codecs and Deployment -- delivered codec porting kit and conformance-test program for ARM, TI DSP, and other embedded silicon partners, enabling Windows Media Audio on hundreds of portable-media-player models.
- Launched the Zune Marketplace backend in 3 months, managing content ingestion, encoding, encryption, delivery, and licensing dependencies across client and service teams; expanded Xbox Music to 22 international markets across Xbox 360, Windows Phone, and Azure-based content processing.
- Earned Microsoft Consultant of the Year, North America (1997) earlier in tenure for driving measurable customer adoption across strategic engagements with Coca-Cola, Macy's, and Georgia-Pacific.

CORE STRENGTHS

API Design and Governance - Developer Platforms - Platform Risk and Compliance - Cross-functional Leadership at Scale - Regulator Engagement (FTC, EU) - AI Infrastructure and Governance - Operational Automation

TECHNICAL SKILLS

API and Platform: API design, developer access controls, OAuth, REST, GraphQL, third-party app review, SDK delivery, developer experience, platform documentation, paved paths and adoption.

AI and LLM: LLM inference, LLM evaluation, dataset governance, responsible AI, RAG, prompt engineering, MCP servers and skills (Claude Code, Codex), vLLM, NVIDIA H100/H200, AMD MI350X.

Languages and Tooling: Python, Node.js, Bash/Shell, SQL, AWS, Git/GitHub.

Open Source: Built and open-sourced LLM-powered developer tools, including semantic search, a Claude Code multi-LLM document-review plugin, and local-LLM file automation. Top external contributor to johannesjo/parallel-code (open-source coding-agent project); contributed the multi-agent orchestration component enabling agents to coordinate other agents. github.com/brooksc.

PATENTS, CERTIFICATION, AND EDUCATION

Patents: Eight issued patents spanning digital rights management, licensing, device certificates, symmetric-key optimization, and member-based domain architecture. **Certification:** Project Management Professional (PMP).

Education: B.S. in Computer Science, Eckerd College.
