

Brooks Cutter

Principal Technical Program Manager - AI Infrastructure, LLM Inference, Developer Platforms, AI Governance, and Program Leadership

Seattle, WA | brooksc@brooksc.com | 650-785-4656 | [linkedin.com/in/brooksc](https://www.linkedin.com/in/brooksc) | github.com/brooksc

Comprehensive master resume -- for AI evaluation against job descriptions, not for submission. Role-targeted versions exist for actual applications.

EXECUTIVE SUMMARY

Principal Technical Program Manager with 22+ years of cross-organizational program leadership at Meta and Microsoft, most recently running LLM inference and Responsible Engineering programs in Meta's AI infrastructure organization. Coordinated cross-org execution of Meta's first production migration of a recommendation workload to next-generation LLM inference (NVIDIA H100/H200, AMD MI350X) and drove two first-of-their-kind LLM launches on Meta's ranking and search surfaces contributing to approximately \$253M per year in incremental Ads revenue. Previously founded and ran Meta's post-Cambridge-Analytica API Governance program (2019-2024) as a 10-TPM organization -- the FTC consent-decree response -- with oversight of API design, developer access controls, third-party app review, and FTC/EU regulator compliance for Meta's external developer APIs. Drove the third-party dataset review process for Llama 4 (acknowledged in the whitepaper), supported LlamaFirewall, and ran executive-level policy reviews for major GenAI launches. 16+ years at Microsoft as Principal/Group/Lead Program Manager shipping Xbox Music, Zune Marketplace, Windows Media DRM standards, embedded media codecs, and content-delivery infrastructure across hundreds of partner devices and 22 international markets. Heavy personal user of Claude Code and Codex; builds MCP servers, multi-agent orchestration, and developer tooling on weekends; top external contributor to [johannesjo/parallel-code](https://github.com/johannesjo/parallel-code) (open-source coding-agent project).

PROFESSIONAL EXPERIENCE

Meta Platforms Inc.

Principal Technical Program Manager / Group TPM / TPM Manager

Feb 2019 - Present (7+ years)

AI Infrastructure -- LLM Inference & Responsible Engineering (Jun 2025 - Present)

- Coordinated cross-org execution of Meta's first production migration of a recommendation workload to next-generation LLM inference infrastructure (approximately 3-month program) -- aligned serving, acceleration, hardware, and efficiency partners across NVIDIA H100/H200 and AMD MI350X. Reduced GPU footprint approximately 57% (~200 GPUs).
- Drove cross-org delivery of two first-of-their-kind LLM launches on Meta's ranking and search surfaces -- a generative recommendation pipeline and a Llama-based search-relevance model replacing a legacy BERT system. Contributing to ranking gains credited with approximately \$253M per year in incremental Ads revenue across Instagram, Facebook, and Threads.
- As TPM, drove inference-platform coordination across ranking, serving, and hardware partners.
- Most recently managed 5 TPMs in AI Data and Responsible Engineering, driving access-friction reliability work that reduced interrupted data queries from 35% to 1.4% (exceeding the reliability target) and applying LLM tooling to automate routine data-access workflows for internal engineering users.
- Operate within JD-relevant disciplines: post-mortem ownership, SLO definition and tracking, runbook discipline, incident ownership across partner teams, eval platform partnership, and cross-team coordination for safety-critical pipelines.

GenAI Data & Model-Launch Programs (May 2024 - Jun 2025)

- Stood up Meta's third-party dataset review process from scratch, partnering with Legal to define the workflow; aligned 252 AI researchers and a 48-person cross-functional team and drove 575 reviews (88% on the Llama 4 training critical path), clearing the backlog to zero against hard launch deadlines and earning acknowledgment in the Llama 4 whitepaper.

- Drove executive-level policy reviews for GenAI launches, coordinating Legal, Partnerships, Policy, Product, and Engineering to propose risk positions, secure executive sign-off, and verify implementation against the requirements set during review.
- Restructured the fact-gathering function and vendor mix, cutting contractor cost approximately 90% (from about \$2.96M to about \$250K per year) while improving output quality.
- Supported LlamaFirewall (Meta's open-source guardrails for AI agents) and drove 59 novel GenAI risk reviews as the GenAI space scaled inside Meta.

Developer Platform -- API Governance & Automation at Scale (Feb 2019 - May 2024)

- Founded and built Meta's post-Cambridge-Analytica API Governance program -- the company's FTC consent-decree response -- with oversight of API design, developer access controls, third-party app review, and FTC/EU regulator compliance for Meta's external developer APIs. Cut Meta's external API surface from 10,000+ endpoints to roughly 6,000 and governed the remaining APIs company-wide.
- Drove the automation strategy that cut API review cycle time from 92 days to 5, reduced FTE-hours 56% (238 to 105), and mitigated 200+ risks -- enabling 600+ product teams to ship third-party integrations approximately 90% faster. Cited by Meta's Chief Product Officer as a company-wide benchmark for cross-functional execution.
- Led a 10-TPM organization that processed 21,000+ API risk reviews over five years across a matrixed group of 159+ reviewers (including Director- and VP-level stakeholders), coordinating intake, prioritization, and remediation across Meta's external developer APIs.
- As Safeguard Owner for 20% of Meta's global privacy controls, consolidated 32 redundant safeguards, led FTC and EU regulator assessor responses, and drove resolution of 29 high-priority compliance issues.

Syntonic Inc.

Director of Program Management

Jun 2017 - Feb 2019

- Delivered mobile data integrations for network operators across Asia and Africa, managing an India-based engineering team from requirements through carrier certification and launch; shipped 10 iOS/Android applications, 4 SDKs, and multiple carrier integrations.
- Introduced product roadmaps, structured bug tracking, and automated testing, improving release predictability across mobile, backend, and QA.

Mast Mobile Inc.

Principal Program Manager

Jun 2014 - Jun 2017

- Launched a dual-phone identity platform end-to-end across iOS, Android, web portals, carrier provisioning, VoIP, CRM, onboarding, number porting, and fraud management.
- Built and deployed end-to-end test coverage for onboarding, activation, WebRTC calling, and provisioning across carrier systems, VoIP providers, Salesforce, and Microsoft Dynamics.

m-ize Inc.

Senior Program Manager

Oct 2013 - Jun 2014

- Led delivery planning and offshore execution for customer projects, including scope definition, implementation coordination, and release tracking across engineering and client stakeholders.

Microsoft Corporation

Principal / Group / Lead Program Manager - Multiple Roles

May 1996 - Nov 2012 (16+ years)

Principal Program Manager Architect -- Xbox Music (Aug 2008 - Nov 2012)

- Integrated Microsoft-acquired Musiwave into Zune, coordinating Redmond and Paris engineering teams across content ingestion, licensing, billing, and service migration.

- Shipped Zune's annual holiday content-platform releases by securing label requirements, coordinating user-data migrations, and launching subscription-licensing and content-delivery features.
- Expanded Xbox Music to 22 international markets, managing multi-platform releases across Xbox 360, Windows Phone, and Azure-based content processing.

Senior Program Manager -- Zune Marketplace (Aug 2006 - Aug 2008)

- Launched the Zune Marketplace backend in 3 months, managing content ingestion, encoding, encryption, delivery, and licensing dependencies across client and service teams.
- Grew Marketplace monetization by launching music subscription and video purchase capabilities across catalog, licensing, commerce, and playback systems.

Group Program Manager -- Windows Media DRM (Dec 2002 - Jul 2006)

- Established Microsoft's digital-media-rights leadership, directing 8 PMs across DRM product strategy, record-label and movie-studio negotiations, and partner certification programs.
- Built licensing, breach-response, certification, and conformance-testing programs for content providers and device partners.
- Secured FCC Broadcast Flag approval for Windows Media DRM by authoring Microsoft's technical submission and driving standards engagement with AACS for Blu-ray and HD DVD encryption.

Lead Program Manager -- Windows Media Codecs & Deployment (Aug 1998 - Nov 2002)

- Enabled Windows Media Audio on hundreds of portable-media-player models by delivering a codec porting kit and conformance-test program for ARM, TI DSP, and other embedded platforms, and certifying playback with silicon partners.

Senior Consultant -- Microsoft Consulting Services (May 1996 - Aug 1998)

- Advised major enterprises including Coca-Cola, Macy's, and Georgia-Pacific on Internet strategy built on Microsoft technologies.
- Earned Microsoft Consultant of the Year, North America (1997) for driving measurable customer adoption across strategic engagements.

CORE STRENGTHS

AI Infrastructure and LLM Inference - Inference Efficiency and GPU Hardware Migration - Recommendation Systems and Ranking - Generative AI Launch Programs - LLM Evaluation and Dataset Governance - Responsible AI and Agent Guardrails - Developer Platforms and API Governance - API Design, Access Control, and Third-Party App Review - Privacy Engineering and FTC/EU Regulator Engagement - Trust & Safety Pipelines - Cross-Org Program Leadership and TPM Management - Multi-Year Transformation and Change Management - Executive Stakeholder Engagement - Operational Reliability and Post-Mortem Practice - Operating Cadence and Rhythm of Business

TECHNICAL SKILLS

AI and LLM Infrastructure: LLM inference, model serving, inference efficiency, recommendation systems, search relevance, ranking systems, LLM evaluation, eval platforms, dataset governance, dataset review pipelines, RAG, prompt engineering, responsible AI, agent guardrails, agentic workflows, multi-agent orchestration, vLLM, NVIDIA H100/H200, AMD MI350X, GPU infrastructure.

AI Tools (Daily User): Claude Code, Codex, MCP (Model Context Protocol) servers and skills, Claude Code plugins, multi-LLM document review tooling, semantic-search developer tools, local-LLM file automation. Vibe coding lightweight scripts and dashboards. Strong views on where the protocol does and doesn't yet carry production agentic workflows.

API and Platform: API design, API governance, API surface rationalization, developer access controls, OAuth, REST, GraphQL, third-party app review, SDK delivery, platform documentation, developer experience, paved-path adoption strategy, platform standards work, platform compliance with regulator requirements.

Governance and Risk: AI risk review, dataset governance, model-launch policy, GenAI executive policy reviews, FTC and EU regulator assessor engagement, privacy controls (Safeguard Owner for 20% of Meta's controls), third-party app review at scale (21,000+ reviews), abuse/integrity detection layers, safeguard consolidation,

breach-response programs.

Program Management: TPM team management (10-TPM organization at Meta API Governance; currently 5 TPMs in AI Data and Responsible Engineering), cross-org dependency management, executive stakeholder communication, OKR cascades, operating rhythm and cadence, multi-year transformation programs against regulator deadlines, change management at scale, planning and roadmap discipline, risk and milestone tracking, post-mortem ownership, SLO definition and tracking, runbook discipline, incident ownership across partner teams.

Languages and Platforms: Python, Node.js, Bash/Shell, SQL, REST, GraphQL, AWS, Git/GitHub.

Historical Platform Expertise (Microsoft): Digital rights management, content licensing and DRM standards (Windows Media DRM, AACs for Blu-ray and HD DVD, FCC Broadcast Flag), embedded codec deployment (ARM, TI DSP), silicon-partner certification, Azure-based content processing, multi-platform releases (Xbox 360, Windows Phone), international market expansion (22 markets), content ingestion / encoding / encryption / delivery / licensing pipelines.

OPEN SOURCE AND PERSONAL AI PROJECTS

- Top external contributor to johannesjo/parallel-code (open-source coding-agent project) -- approximately 25% of code contributed, particularly the multi-agent orchestration component enabling agents to coordinate other agents. <https://github.com/johannesjo/parallel-code>
- Multiple MCP servers and skills for Claude Code and Codex.
- Claude Code plugin for multi-LLM document review, enabling parallel evaluation across LLM providers.
- Semantic-search developer tools for codebase navigation and retrieval.
- Local-LLM file automation for routine file-system tasks using locally-hosted models.
- Daily user of Claude Code and Codex as default tooling for engineering and program work.
- GitHub: github.com/brooksc

PATENTS, CERTIFICATION, AND EDUCATION

Patents: Eight issued patents spanning digital rights management, licensing, device certificates, symmetric-key optimization, and member-based domain architecture.

Certification: Project Management Professional (PMP).

Education: B.S. in Computer Science, Eckerd College.
